

AUGUST 2015 MONTHLY REPORT

Were into the middle of August already, seems like summer is ending fast. We have managed to get Little Pond Rd paved where the bad dip was by the pond, so that is a lot safer now. The Town Hall has the parking lot finished, still need to do some landscaping around the big maple tree and put another section of fence in. The new sign is up to the park.

Got 05 International back today, had to have new ball joints put in it. We have finished up screening gravel, so we have enough to do the projects that I want to do, and so the repairs on Cook Dr.

Put some millings in the park where the parking lot is and some new parking signs. Have been cleaning up some more around the garage and made more room for parking the equipment.

The trees are all cut up on Stone Hill Rd on the state and they have been there and inspected it, all is good. I don't like the brush piles on the side of the Rd, but that's what they wanted, they want to leave it there for the wild life. We still have some upper tree work to get done.

Want to get chip sealing done by the end of August, if the weather stays good. Still have tree work to do on many Rds, and shoulder work, fix that spot on Foil Rd where it sinks every winter.

We were in the Town of Albion for 3 days helping chip seal. I have the Town of Albion and Williamstown this week helping chip seal.

I'm hoping to have the majority of my projects I had scheduled done before winter.
